BOARD OF PUBLIC WORKS

Greetings,

I appreciate all of the research you have put into the LNG project proposed by Dominion Cove Point. With the 2 years of study, research, and countless pages of documentation that went into your environmental review, you have gone the extra mile to be certain that this project will be safely conducted with no significant environmental impact.

As a Calvert County resident, I am aware that we are in great need of jobs and tax revenue. It is a shame that so many have to commute long distances just to feed their families. With this project, many of these people will be able to work closer to home and spend more time with their families. Furthermore, we, as a nation, will be making a difference in the world environmental climate by giving India a clean source of energy. Therefore, I urge you to follow suit with your findings and give your final stamp of approval so Calvert County can finally move forward and get the economic boost it so sorely needs.

Thank you for your consideration,

Rosemarie Angle

PS: Also CC'd in this letter are Sheila McDonald and Governor Martin O'Malley
